

RSB GROUP FELICITATES “CHANGE MAKER” WOMAN LEADERS

RSB took the pride of felicitating “Change Maker” woman leaders and were presented with laurels by the hands of Ms Urmila Behera while Ms Nirmala Behera, Executive Director – Group HR, delivered motivational address. In a special award ceremony organized on the occasion, four women leaders from Pune, namely, Ms Ganga Patil, Ms Vandana Dhotre, Ms Sneha Bharati and Ms Rishita More, who brought significant social impact in the society, & have respectively helped orphaned elderly woman in the evening of their life by supporting their livelihood, educational support to girls school drop-outs due to resource constraints by imparting free education, skill development training to under-privileged in deep rural areas and more so, a trans-gender woman leader, who rose to become a successful entrepreneur despite society’s resistance to such genders, were given warm welcome with an inspirational address and presented with laurels.

RSB Group felicitates women leaders

Friday, 31 March 2023 | PNS | Jamshedpur

RSB felicitated “Change Maker” woman leaders and were presented with laurels by the hands of Urmila Behera while Nirmala Behera, Executive Director – Group HR, delivered a motivational address. In a special award ceremony organized on the occasion, four women leaders from Pune, namely, Ganga Patil, Vandana Dhotre, Sneha Bharati and Rishita More, who brought significant social impact in the society, & have respectively helped orphaned elderly woman in the evening of their life by supporting their livelihood, educational support to girls school drop-outs due to resource constraints by imparting free education, skill development training to underprivileged in deep rural areas and more so, a trans-gender woman leader, who rose to become a successful entrepreneur despite society’s resistance to such genders, were given warm welcome with an inspirational address and presented with laurels.

NEW APPOINTMENT

Jitendra Shah new President of FAM

The Federation of Associations of Maharashtra (FAM) declared the result of the election of the executive committee members. The Elected Executive Committee members unanimously elected Jitendra M Shah as the president of the term of two years ie 2023-2025.

Jitendra Shah on being elected as the new president commented, "I am really thankful to all of you for believing in me & my capacity to work for Traders / Businessmen of Maharashtra and with the blessing to my Almighty, my family and all you friends, I am thankful to my entire ECM for unanimously selecting me as the President of Federation of Associations of Maharashtra (FAM - Apex body representing the associations of Maharashtra) for the term 2023-2025. I have to become youngest & first ever Massma Member as President of FAM. I feel humbled and grateful to one and all." Further he added, "When I started my journey as a committee member of Massma in 2010, and

had a privilege to attend few meeting at FAM and had interaction with Mr Mohan Gurnani, President and his team and always dreamt whether ever I would be able to become President of FAM, but in last 13 years I always tried to give my best as and when called for and worked with many great heroes of FAM... from special invitee in 2012, to Coopted member in 2014, to secretary in 2016, Vice President in 2018, Sr vice president 2020 and finally President now in 2023."

He said, "I am thankful to Shri Sudhir Mungantiwarji, Minister Maharashtra Cabinet, Shri Mangal Prabhatji Lodha, Minister Maharashtra Cabinet & Shri Raj Purohitji Ex Cabinet Minister Maharashtra and various other state ministers & centre ministers both have supported as and when needed. Special thanks to my parent body Metal & Stainless steel Merchant's Association (MASSMA) for nominating me and giving me chance to represent them at FAM."

SOLAR POWER

Sunnier show by solar projects this fiscal, but some still fall short

The performance of solar power turned sunnier this fiscal, with 75% of the projects expected to exceed their P90 level of generation, compared with only 59% last fiscal. But the metric still indicates underperformance as 25% did not meet their P90 level. However, these assets still have adequate cash-flow cushion for debt servicing. Their level of underperformance is not alarming either and recovery in performance is expected.

A study of 115 solar projects aggregating ~4.6 gigawatt (GW), with operational record of at least one full year to eliminate performance volatility during the stabilisation phase, indicates as much.

The performance on the P90 metric is crucial as it is used widely to estimate the cash-flow cushion available for debt servicing. A project's future cash flows are estimated at generation corresponding to the

P90 level of confidence to appropriately account for volatility in solar irradiation.

Thus, a material and continuous underperformance with respect to P90 may result in lower-than-expected cushion for debt servicing. Generation that is 1 percentage point lower than P90 level reduces debt servicing cushion by ~15% and lowers return on equity by 1.5-2.0 percentage points.

Says Manish Gupta, Senior Director, CRISIL Ratings, "Though an estimated 25% of the projects are expected to underperform this fiscal, their median ratings are largely unaffected as 55% of these had generation just 0-1% below their P90 level (at which they were modelled) and another 20% fell short by 1-1.5%. This level of underperformance reduces the debt-servicing cushion, but cushion but does not impair debt-servicing capability. This is because generation is dependent on levels of irradiation, which are volatile, and hence, debt servicing levels of projects typically have cushions to absorb such variation."

Further the performances are expected to recover over the medium term.

Says Ankit Hakhu, Director, CRISIL Ratings, "Irradiation levels are expected to be mean-reverting. There have been cycles of weaker years and better years compared with long-term averages earlier as well. For instance, 2015 to 2017 were good years with irradiation levels 2-5% higher than average, followed by weaker 2018 and 2020 (refer to chart in annexure). Indeed, two-thirds of the underperforming projects did so because of lower irradiation. Hence, as irradiation levels improve, the performance of these projects should also recover towards expected levels."

Others underperformed on account of operational issues such as machine or plant breakdown and grid unavailability, which are temporary and controllable. Once the issues are rectified, their performance should improve.

rose to become a successful entrepreneur despite society's resistance to such genders, were given warm welcome with an inspirational address and presented with laurels.

TECHNO TRACK

SMS group puts continuous caster successfully into operation at Nucor Corp

One of the world's largest casters, the single-strand caster supplied by SMS group for ultra-wide and thick slabs, has successfully started production at Nucor Corporation. Designed for an annual capacity of 1.45 million tonne (1.6 million short tonne), the slab caster is a core element of the production chain for the new plate mill at Nucor in Brandenburg, Kentucky, U.S.

This makes Nucor Steel Brandenburg one of a few mills in the United States capable of manufacturing at scale the heavy gauge plate used in monopile foundations for offshore wind towers. The new mill is located in the middle of the largest steel plate-consuming region in the country and will be able to produce 97 percent of the plate

products that are bought and used on the domestic market. "SMS group and Nucor are a good team and we are proud that one of the largest continuous casters has now started production. The caster is of crucial importance for the success of our new plate mill. In this way, we can successfully contribute to our government's plan to build a total of 30 GW of

offshore capacity by 2030," says Johnny Jacobs, Vice President and General Manager at Nucor Brandenburg.

"The use of renewable energies and thus also offshore wind energy is applied environmental protection. It is very important to us to support such projects with our technologies," says Burkhard Dahmen, CEO of SMS group.

The caster is used to cast slabs ranging from 8 to 12 inches (203 to 305 millimeters) thick and 60 to 124 inches (1,524 to 3,150 millimeters) wide. Slab lengths vary from 104 to 600 inches (2,642 to 15,240 millimeters). With HD LASr, the new alignment standard, mold and segments are measured easily and precisely in the maintenance workshop.

RSB Group Felicitates Women Leaders for Their Social Impact

#RSBGroup #Women Leaders #SocialImpact #ChangeMaker

These leaders, namely Ganga Patil, Vandana Dhotre, Sneha Bharati and Rishita More, have brought significant social impact in the society through their respective work.

April 2023 : The RSB Group has recently felicitated “Change Maker” women leaders. These leaders were presented with laurels at the hands of Urmila Behera, wife of the Group Chairman, RK Behera. Nirmala Behera, Executive Director – Group HR, delivered a motivational address. In a special awards ceremony organized on the occasion, four leaders from Pune were recognised as Change Maker Women Leaders.

These leaders, namely Ganga Patil, Vandana Dhotre, Sneha Bharati and Rishita More, have brought significant social impact in the society through their respective work. Ganga Patil has helped elderly women in the evening of their life by supporting their livelihood. Vandana Dhotre has given educational support to girl school drop-outs, while Sneha Bharati has provided skill development training to under-privileged in the remote rural areas. Rishita More is a trans-gender leader, who rose to become a successful entrepreneur despite society's resistance.
